ЛАБОРАТОРНА РОБОТА №1

з дисципліни «Криптографія»

«Експериментальна оцінка ентропії на символ джерела відкритого тексту»

Виконали:

студенти 3 курсу ФТІ

групи ФБ-81

Близнюк Микола та Мишкін Артем

Перевірили:

Чорний О.

Завдання

Мета роботи

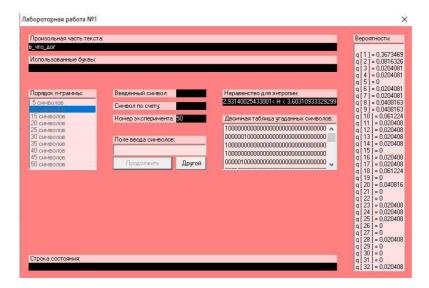

Засвоєння понять ентропії на символ джерела та його надлишковості, вивчення та порівняння різних моделей джерела відкритого тексту для наближеного визначення ентропії, набуття практичних навичок щодо оцінки ентропії на символ джерела.

Порядок виконання роботи

- 0. Уважно прочитати методичні вказівки до виконання комп'ютерного практикуму.
- 1. Написати програми для підрахунку частот букв і частот біграм в тексті, а також підрахунку Н1 та Н2 за безпосереднім означенням. Підрахувати частоти букв та біграм, а також значення Н1 та Н2 на довільно обраному тексті російською мовою достатньої довжини (щонайменше 1Мб), де імовірності замінити відповідними частотами. Також одержати значення 1 Н та 2 Н на тому ж тексті, в якому вилучено всі пробіли.
- 2. За допомогою програми CoolPinkProgram оцінити значення $\mathrm{H}(10)$, $\mathrm{H}(20)$, $\mathrm{H}(30)$.
- 3. Використовуючи отримані значення ентропії, оцінити надлишковість російської мови в різних моделях джерела

Висновки

Під час виконання комп'ютерного практикуму № 1. Ми експериментально оцінили ентропію на символ джерела та надлишковість на прикладі російського алфавіту. Ми порівняли ентропію та надлишковість для монограм і для біграм з пробілом та без нього.
